FOX FARM

SOIL & FERTILIZER COMPANY

BIG BLOOMS

2-5-7

16 fl oz 1 lb

Directions for Use:

Shake well before each use. Mix three pumps of liquid fertilizer concentrate per one gallon of water in a clean watering can. Stir or shake until the solution is thoroughly blended. Apply the mixture directly to the soil around the base of each plant, allowing it to soak evenly into the roots. Avoid pouring directly onto leaves.

Storage and Safety:

Store the bottle in a cool, dry place away from direct sunlight and extreme temps. Keep tightly sealed when not in use. Always wear gloves when handling concentrate and wash hands after mixing or applying. Avoid contact with eyes or skin. Keep out of reach of children and pets.

Finished this bottle?

Refill with our Powder Concentrate or reuse this bottle for propagations.

Directions for Use:

Shake well before each use. Mix
Measure one teaspoon of
powdered fertilizer per one
gallon of water. (To make liquid
consternate add a 1/4 cup
powder to 10 oz of water) Add
the powder to a clean watering
can, then pour in water to help
dissolve it completely. Stir until
no granules remain, then fill the
can with the remaining water
and mix thoroughly. Apply the
solution evenly around the base
of your plants, ensuring the soil
near the roots is moistened but
not over saturated.

Storage and Safety:

Store the bottle in a cool, dry place
away from direct sunlight and
extreme temps. Keep tightly sealed
when not in use. Always wear
gloves when handling concentrate
and wash hands after mixing or
applying. Avoid contact with eyes
or skin. Keep out of reach of
children and pets.
